Low Carbon City Development World Forum

June 16-19, 2013

**Shenzhen,
China**

Register now!

To register for
the event, visit
www.walcc.org.

The Low-Carbon City Development World Forum, now marking its 4th gathering, has quickly established itself as a major international development platform for sustainability issues.

Join us in Shenzhen to engage in a highly dynamic discussion on the development of a low-carbon future, one of the most important topics of our time, and explore the secrets to Shenzhen's sustainable development, a Chinese model of best practice. Learn more about the forum, meet us at the **WALCC Finland Workshop** on **April, 10, 2013** in Helsinki. The workshop is free of charge.

Forum Highlights

- Catalyze business opportunities for international players in China.
- Meet key policy makers in China and discover their insights on creating a low-carbon future.
- Talk to financiers keen to invest in cutting-edge low carbon solutions.
- Mingle with hundreds of renowned business figures, thought leaders and decision makers.
- Full day site visit hosted by the City of Shenzhen which is actively recruiting international partnerships in low-carbon solutions.

Fourth Low-Carbon City Development World Forum Agenda

June 16-19, 2013, Shenzhen, China - Venue: Shenzhen Convention & Exhibition Center

Sunday, June 16th

14.00-18.00 Reception and Registration
18.00-20.00 Welcome Dinner

Monday, June 17th

09.00-10.00 Opening address
10.00-12.00 Keynote Speeches
Keynote speeches from high level government officials addressing China's low-carbon landscape and how technologies can help Chinese cities to balance economic growth with environmental sustainability. Speakers include the Head of the National Development and Reform Commission's Department of Climate Change, the Vice Director of the Shenzhen Development and Reform Commission, the head of the WALCC and foreign dignitaries.

12.00-13.00 Lunch
13.00-18.00 Successful Low-Carbon Solutions Showcases
Low-carbon pioneer cities and their partners together share successful practices for realizing sustainable development. Three cities along with several commercial partners demonstrate creative solutions for bringing together the pieces of low-carbon solutions through technology, policy, finance, and infrastructure.

18.00-20.00 Banquet

Tuesday, June 18th

09.00-09.30 Key note session; forming a joint agenda
09.30-12.00 Three parallel seminars:
Track A. City Planning, focus on urbanization, Eco-city planning and renovation.
Track B. Green Building, focus on green building, energy saving and real estate development for seniors.
Track C. Renewable Resources, focus on renewable energy, material usage, smart power generation, and smart grids.

12.00-13.00 Lunch
13.00-13.30 Key note session; forming a joint agenda
13.30-17.00 Three parallel seminars:
Track C (continued from morning). Renewable Resources, focus on renewable energy, material usage, smart power generation, and smart grids.
